

METHOD AND SYSTEM FOR ANALYZING APPLICATION NEEDS OF AN ENTITY

Abstract

A method and system for analyzing application needs on an entity.

5 Specifically, the present invention presents an entity with sets of questions and weighted responses pertaining to the entity's applications. The sets of questions and weighted responses are formulated based upon the entity's business strategy. The entity's responses to the questions are analyzed. Based on the analysis, recommendations regarding the entity's applications are made.
